Earl Ferrer : Mostly Phobic: An Adult Coloring Book Featuring Real and Fake Phobias before purchasing it in order to gage whether or not it would be worth my time, and all praised Mostly Phobic: An Adult Coloring Book Featuring Real and Fake Phobias:

We all got our fears, it could be small as a bug or as scary as a clown. There are just some things in this world that will terrify us. With MOSTLY PHOBIC, you can choose from 30 original drawings of some of the most common phobias people have (ranging from the disgusting to absurd and to the made up ones). Conquer your fears as you tackle each phobia head on with your colored pencils! Or at the very least, relieve some stress and relax by coloring in some absurd drawings. Each phobia is printed on a single-sided sheet of paper. They are designed for adults, but don't let

that stop children from coloring in a few scares!
